*Abstract:* The Public Water System Supervision (PWSS) Program ICR examines public water system, primacy agency (e.g., states and tribes with primary enforcement authority) and tribal operator certification provider burden, and costs for “cross-cutting” recordkeeping and reporting requirements (i.e., the burden and costs for complying with drinking water information requirements that are not associated with contaminant-specific rulemakings). The following activities have recordkeeping and reporting requirements that are mandatory for compliance with the Code of Federal Regulations (CFR) at 40 CFR parts 141 and 142: the Consumer Confidence Report Rule (CCR), the Variance and Exemption Rule (V/E Rule), General State Primacy Activities, the Public Notification (PN) Rule and Proficiency Testing Studies for Drinking Water Laboratories. The information collection activities for both the Operator Certification and the Capacity Development Program are driven by the grant withholding and reporting provisions

under sections 1419 and 1420, respectively, of the Safe Drinking Water Act. The information collection for the Tribal Operator Certification Program is driven by grant eligibility requirements outlined in the Drinking Water Infrastructure Grant Tribal Set-Aside Program Final Guidelines and the Tribal Drinking Water Operator Certification Program Guidelines.

*Form Numbers:* None.

*Respondents/affected entities:* Entities potentially affected by this action are new and existing public water systems and primacy agencies.

*Respondent's obligation to respond:* Mandatory for compliance with 40 CFR parts 141 and 142.

*Estimated number of respondents:* 148,674 (total).

*Frequency of response:* Varies by requirement (i.e., on occasion, monthly, quarterly, semi-annually, and annually).

*Total estimated burden:* 3,643,372 hours (per year). Burden is defined at 5 CFR 1320.03(b)

*Total estimated cost:* \$192,654,000 (per year), includes \$38,121,000 in operation and maintenance costs.

*Changes in the Estimates:* There is a decrease of 125,841 hours in the total estimated annual respondent burden compared with the ICR currently approved by OMB. This decrease is a result of: updating relevant baseline information for each rule with the most current and accurate information available (e.g., public water system inventory); and, updating burden to include expected reductions associated with use of a cloud-based reporting database. Where appropriate and available, estimated violation and other associated rates have also been updated to reflect current information on rule compliance.
